**Swift**

# The affordable programmable alternative

Swift is a new attractive programmable hearing instrument from Oticon. It offers a high standard of individualised hearing care at an affordable price.

## **Programmed by computer**

Swift's sound processor is digitally programmed to compensate for your unique hearing loss. Using the latest computer technology, Swift lets your hearing care professional make an accurate fitting of your hearing instrument. The result is better hearing - whether you are a first time user or have been wearing hearing instruments for years.

## **First rate sound quality**

Swift's sound quality is amongst the very best in its price class. New microchip technology and high quality components mean that you can experience the benefits of low distortion and clear sound amplification. Listen to it and judge for yourself!

## **Comfortable to wear – easy to use**

Swift is one of the lightest and slimmest instruments available, which together with

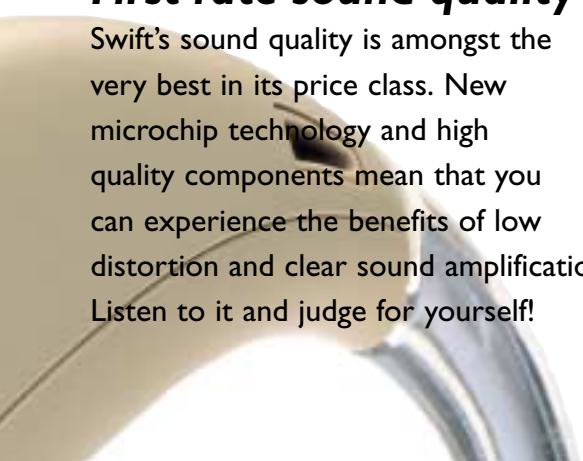

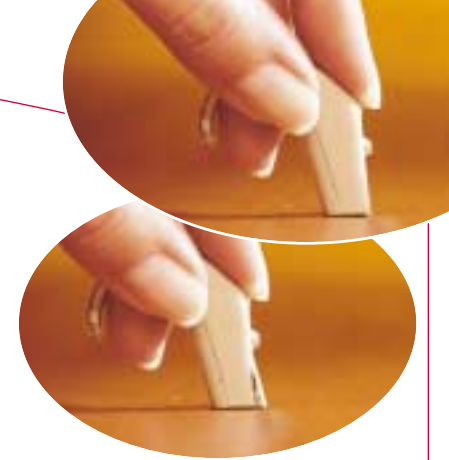

the unique swing hook make it very comfortable to wear. The "press and slide" on/off switch and a push-button telecoil (in "Swift+" instruments) make it easy to operate.

*Swift features a unique "press and slide" on/off switch.*

## **Mobile phone compatible**

Swift has an effective built-in protection against annoying interference from mobile telephones - whether you are a mobile phone user or just next to someone who is using one.

*Swift is individually programmed to fit your unique hearing needs.*

## ***Reliable by design***

With proven, high-quality components and a robust construction, Swift is one of the most reliable hearing instruments available. So you can enjoy the benefits of quality hearing care - without the inconvenience and expense of repairs!

*Nice design and a robust construction deliver comfortable use every day.*

## ***Superior hearing aids since 1904***

Swift is designed and manufactured in Denmark by Oticon.

Founded in 1904, Oticon is one of the world's foremost manufacturers of quality hearing instruments. Millions of people in more than 100 countries rely on Oticon hearing instruments every day. Hear the difference for yourself. Arrange an appointment with your hearing care professional and try Swift!
