# Hearing Should Be Effortless

**oticon**  
PEOPLE FIRST

# Oticon Tego

## – the agility to respond!

As someone who has used hearing aids before, you know how vital it is to be able to follow changes in your environment. Whether it's people asking questions, giving instructions or telling jokes, you don't want to miss a single moment!

If you've felt let down by hearing aids at some time in the past – perhaps because they didn't always support the kind of life you lead – then you'll be pleased to learn that new opportunities are now within reach.

## A technological leap

Many digital hearing aids have features such as directional microphones, or noise reducing circuits to help you hear better. However, these aids still require you to make the judgment on when to use these features and to manually turn them on.

Tego is different...

Tego is equipped with a radical new system called DecisionMaker. DecisionMaker uses Artificial Intelligence to make hearing as effortless as it should be. Tego is the smartest, most effective and easiest to use instrument of its class available today!

# What is DecisionMaker?

Oticon Tego incorporates many sophisticated sound processing features designed to anticipate your every need.

Making thousands of tiny adjustments per second, DecisionMaker constantly optimizes the performance of these features to ensure speech understanding, comfort and overall sound quality. Not only does Tego adjust to your environment, but it is done “hands free.” You no longer have to worry about switching programs or thinking about what mode your hearing aid is in. Tego does it all for you.

With DecisionMaker’s support, you can be sure that Tego is always correctly set – giving the best performance every second. You can then focus on more important things – with a little more freedom to live the life you want.

# Let Tego Help You Live the Life You Want!

Stop fussing with program buttons and switches, try Tego and see for yourself the benefits and freedom that an a hearing aid powered with Artificial intelligence can bring to you!.

hearing and Oticon Tego!**

# People first

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
