PEOPLE FIRST

# Define your world of hearing

The decision to wear hearing aids is a major one. Loss of hearing is one of the most common conditions experienced by Americans today. In fact one out of every two adults over the age of 60 has a measurable amount of hearing impairment. Unfortunately, most people wait entirely too long to address their problem.

New developments in hearing care now give you options to define your world of hearing that were unheard of only a few years ago. A new hearing aid, Oticon Tego, combines advanced automatic features with Artificial Intelligence to make hearing as effortless as it should be.

Stop worrying about the hearing you have lost, and maximize the hearing you still have with Oticon Tego.

# Tego redefines affordable hearing care

Hearing solutions have developed a great deal over the past few years – and Oticon’s new Tego is the most advanced of its kind available.

Tego uses Artificial Intelligence to automatically adjust as your environment changes, helping you to focus on what you want to hear and decreases annoying background sounds.

With its unique DecisionMaker system, Tego provides a “hands free” experience, automatically adjusting its advanced features for you. The DecisionMaker system ensures that sound is perfect wherever you go.

# Explore a new universe

With Tego, you can once again have the confidence needed to live the life you want with the hearing you have.

Your decision to wear a hearing aid is the correct one. The next choice you have to make is which hearing aid will benefit you the most. Oticon Tego offers the most complete combination of the features you will need to help you hear well in a variety of listening situations. Furthermore, Tego does this at a price which is much less than comparable hearing aids.

**Call your hearing care professional today for more information about your hearing and Oticon Tego!**

# People first

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
